TC Industries of Europe, Ltd.

POSITION TITLE

Maintenance Technician

PRIMARY OBJECTIVE(S) OF POSITION

TC Industries of Europe Ltd has an opening for a Multi-Skilled (Electrical & Mechanical) time served maintenance technician to join our energetic maintenance team. We are prepared to provide the adequate cross training for the appropriate candidate to become the multi skilled technician we are looking for. We are looking to recruit an enthusiastic, dynamic, focused and committed team player with excellent communication skills to join our highly successful company. The company itself has been established for over 125 years, with 4 facilities worldwide and we are the world leaders in our particular field.

You should be familiar with working in a fast-moving manufacturing environment and ideally you will be from an industrial background and be prepared to work shifts, with some weekend work required as and when the business conditions dictate.

The role itself involves working autonomously and in a small team covering both pre-planned and reactive maintenance on plant equipment and machinery. We are committed to continuous improvement and encourage technicians to use their initiative to improve and develop equipment and processes.

We are committed to continuous improvement, providing a good working environment and investment in our employees through training. We are ISO 9001 accredited, deploy 6 Sigma and Lean Manufacturing throughout our operations and worldwide facilities and are committed to achieving external supplier quality excellence programs.

ESSENTIAL DUTIES AND RESPONSIBILITIES

- Repair and maintain plant machinery and equipment such as Drilling Machines, Presses, Heat treatment furnaces, shot blast machines, Automated powder paint plant and CNC machines.
- Rapid response to breakdowns on production equipment.
- Diagnostic and repair or replace of control devices such as motors, contactors and control gear, sensors etc.
